Talk'n'Job

Voice–driven chat–application

via Recruitee

The application process

Candidate

API

3 After the applicant has finished the chat and applied with his contact details, he/she will receive a confirmation email.

2 The chat automatically contains and displays the individual job information (jobTitle, company name, chat history, etc.) from the interface.

1 An applicant sees the opportunity to apply, activates the call-to-action and gets directly into the chat.

4 Our system assigns the applicant to the appropriate candidate pool and attaches a PDF as a resume including a transcript of the chat history.

Talk'n'Job

Onboarding process

1) Handover credentials

Consisting of:

- Account Tokken
- Company ID

(the customer can send them to TnJ independently as shown on page 4)

2) onboarding

Standard TnJ onboarding:
